

VINIT KUMAR GUPTA

SOFTWARE ENGINEER | MACHINE LEARNING | FULL STACK | DSA

officialvinit1176@gmail.com | [LinkedIn](#) | [Github](#) | [Leetcode](#) | [HackerRank](#) | [Credly](#) | [Portfolio](#) | +919621030649

Skills:

- **Programming Languages:** Python, Java, JavaScript, C/C++
- **Frontend Technologies:** HTML, CSS, JavaScript, React, Angular, Jetpack Compose(Android)
- **Backend Technologies:** ExpressJs, NodeJs, Flask, Retrofit(Android)
- **Machine Learning:** ScikitLearn, pyTorch
- **GENAI:** LLMs, RAG, LangChain, Transformers, OpenAI APIs, AgenticAI
- **DevOps:** System Design, Redis, Computer Networks, Docker, AWS, Render, Vercel
- **APIs:** RESTAPI
- **Database:** MongoDB, MySQL, RoomDB(Android)
- **AWS services:** IAM, EC2, EBS, ELB, S3, Amplify

Work Experience:

PiyushDhara Eduverse | WebSite Developer Intern | 01 October 2025 – 01 January 2026

- **End-to-End Development:** Engineered and deployed a comprehensive full-stack ecosystem using the MERN stack, featuring separate, highly responsive platforms for users and administrators.
- **Infrastructure Management:** Managed the complete deployment lifecycle, including domain acquisition, DNS configuration, and hosting to ensure 24/7 site availability.
- **Admin Dashboard:** Built a custom administrative portal to manage dynamic content, monitor user activity, and provide real-time data oversight.

User Website: www.piyushdhara.com

Admin Website (Authentication Required) : www.admin.piyushdhara.com

Projects: (More on GitHub)

Project-1: BhindiOnline - Your Chatting Platform (MERN + Socket.IO)

Built a full-stack chat platform using React, Redux Toolkit, Tailwind CSS, Node.js, Express, MongoDB, and Socket.IO for instant one-to-one messaging. Implemented secure authentication with JWT, HTTP-only cookies, bcrypt password hashing, and protected routes for signup, login, and logout flows. Integrated profile/image upload with Multer + Cloudinary and added real-time online user presence tracking with live message delivery.

Github: <https://github.com/Official-Vinit/bhindiOnline.git>

Project-2: Text Summarizer using T5 (GENAI)

Trained model to summarize the texts with 6 epochs for increased accuracy

Used google-T5-small as transformer with 4000 samples for training and 350 samples for validation

Github: <https://github.com/Official-Vinit/TextSummarizer.git>

Project-3: RAG integration with LLMS - OpenAI, GROQ

Built persistent vector store using ChromaDB with custom VectorStoreManager class for efficient storage and retrieval of document embeddings

Implemented semantic search RAGRetriever with cosine similarity-based ranking to retrieve top-k most relevant document chunks with configurable score thresholds

Integrated multiple LLM providers (OpenAI GPT, Groq qwen/qwen3-32b) with unified prompt engineering interface for retrieval-augmented generation

Github: <https://github.com/Official-Vinit/RAGwithLLMPipeline.git>

Project-4: CDC - Placement Cell Management System(MERN)

Implemented secure JWT-based authentication and role-based access control for multiple user roles (admin, students).

Implemented file upload functionality with Cloudinary for resume and document management.

Github: <https://github.com/Official-Vinit/CDCWork>

Education

B-Tech InformationTechnology

KPR Institute of Engineering and Technology, Coimbatore

(honors in FullStack Development)

Higher Secondary School (12th)

Physics, Chemistry, Maths & Computer

High School (10th)

CGPA: 8.38/10

82 percentage

85 percentage

Achievements & Certifications

• [MongoDB Certified Associate Developer](#)

• [AWS Academy Cloud Foundation Certificate](#)

• [Deloitte Australia Data Analytics Job Simulation on Forage](#)

• [Microsoft & EY AI Skills Passport](#)

• [5star at problem solving \(HackerRank\)](#).

• [250+ on Leetcode](#)

• [JavaScript Algorithms and Data Structures](#)

• [Problem Solving in C](#)
